**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**

**MEMORANDUM**

**DATE:** January 3, 1986  
**TO:** Engineering Division Engineers  
**FROM:** Sanford M. Weiss, Director of Engineering /s/ SMW  
**SUBJECT:** NSR Innovative Technology Exemption

As you know, Rule 1304 provides an exemption from certain aspects of Regulation XIII when “innovative technology” control equipment is to be installed. While there are very few times when such an exemption is requested by the applicant, in the District’s considerations. For that reason, Mr. Stuart has requested that we do not give any opinions on the likelihood that a permit to construct or operate being issued for such innovative technology units without his specific authorization. In addition, the permits for such units must be cleared by Mr. Stuart before going to public notice under Regulation XIII.
